HANDMADE SEED PAPER

Materials + Setup

**SEEDS any seeds that you have on hand will work*

these items can be recycled from household materials

wire coat hanger bent into diamond shape

cheesecloth, old nylons or other "screen material"

recycled paper (newspaper, construction paper)

these items can be found in most homes

Blender, Mixing Spoon, Mixing Bowl, Tray, Water

2 Towels, Plastic Bag or Cover, Rolling Pin

optional

thread, cotton, yarn or other fibres

Setup

find a work surface that can be wiped clean

Bend a wire coat hanger to make a square

Pull one leg of nylons over the square to make a screen

Spread several layers of newspaper on a tray

Cover them with a layer or two of kitchen towels

HANDMADE SEED PAPER

Instructions

note: the blender should only be used with supervision

Tear the paper into small pieces; place in a mixing bowl

Add enough water to cover the paper,
Let it soak for at least an hour, up to a day
Add more water if the paper soaks it all up

Use the blender to break up the paper into smaller pieces until it becomes a thick mixture
Pour any extra water out of the blender or add more paper to soak it up

Optional: Stir in seeds or yarn and fibres, using a mixing bowl

Put the screen on top of the towels on the tray
Spoon the mixture onto it and spread in a thin layer
Lay a plastic bag on top and roll over with a rolling pin

Even out the pulp and squeeze out extra water

Finishing

don't forget to wipe down your work surface!

Peel off the plastic bag and lift the screen

Lay the screen on fresh newspaper,
Dry for about 3 days

Peel your paper off the screen,
you will have a piece of recycled paper!
